

The air is
better here.™

Chez Catherine

MEASURED HEALTHY INDOOR AIR

Chez Catherine is equipped with a state-of-the-art mechanical system that continuously monitors, disinfects and purifies the air you breathe.

Chez Catherine is taking a proactive step, providing measured, healthy indoor air quality, and ensuring that the air you breathe has a positive impact on your health and wellness. By implementing AtmosAir Solutions' air purification and monitoring technology, Chez Catherine contributes to better health by restoring air to its natural state where no pollution or contaminants exist.

- 99.9% effective at eliminating coronavirus
- Removes other airborne viruses & bacteria missed by typical filtration systems
- Continuously measures indoor air quality and provides
- Measurably Cleaner Air™
- Provides indoor air quality monthly reporting and data

BETTER FOR YOU, BETTER FOR THE ENVIRONMENT

Chez Catherine has implemented air treatment and air monitoring technology to more efficiently control the restaurant's energy spend and Green House Gas emissions. All guests will benefit from the significant energy savings and optimized air quality.
